

Analysis of Resilience Lessons in the Sahel

Project Title	Analysis of Resilience Lessons in the Sahel
Project Summary	Meta-analysis of what we have learned about resilience programming in the Sahel.
Country	Senegal
Agency	Agency for International Development
DoS Office	N/A
Post	N/A
Section	N/A
Number of Interns	1

Project Description

USAID/Senegal's Sahel Regional Office is seeking an intern to do a meta-analysis of our \$330 million, five-year resilience project, Resilience in the Sahel Enhanced (RISE). The project has worked in the areas of agricultural development, natural resource management, nutrition, water and sanitation, family planning, food security, early warning of shocks, and good governance and policy development. This work entails reviewing all project documents from the activities that make up RISE and that have been produced since their launch. We hope that this critical analysis of the project literature will result in key lessons that would both guide future resilience work in the region and contribute to the broader understanding of the challenges faced by development practitioners working in the Sahel.

Desired Skills Interests

Additional Information

This would be an ideal opportunity for a student studying or an interest in international development, food security, economics, or African Studies. French language ability is not required but could be an asset, depending on the intern's motivation. Students studying abroad in Senegal, or doing field work in the region would be welcome.

Language Requirements

Language	Speaking Proficiency	Reading Proficiency	Importance
French	Elementary proficiency	Limited working proficiency	Nice to Have
